To whom it may concern:

I am writing to you on behalf of an international, multi-disciplinary research project, in partnership with the **International Council of Integrative Medicine.** Our objective is to gather scientific data on the how miracles occur through Divine blessings. Our goal is to help the public discriminate between a person with Divine power and the fake healers and spiritual leaders who can not show concrete results. I am part of the advisory group, which includes professionals from various disciplines, including, Dr. R.H. Brian Costello (Australia), Dr. John Levin (Australia), Pip McCahon of MIDI Clinics (Australia), Dr. Choudhary (India), Nick Patel (USA), Sanjana Sarna (USA), Dr. Christine Sullivan (Canada) and Dr.Derek Pyper (Canada). I am a Canadian chiropractor with a specialty in sports therapy, a post-graduate Fellowship in Pediatrics and Cranial Sacral Therapy. We are looking for scientists and scientists are looking for us. Many scientists, in the areas of physics, genetics, neurology, bioengineering, energy medicine, alternative and complementary health, and crop circle research are looking for a person who they can study directly or who can produce results that they can study. We are looking for people who are successful in everyway in their life but they are still not happy are not completely satisfied and are looking for a new challenge something that will bring them happiness and satisfaction. These are the people we are looking for. For the last five months I have been the assistant for an exceptional 41 year old man Guruji, who is gifted with Divine energy and has the capacity to show miracles through his blessings. Guruji was in Canada from April 2004 to July 2004 and blessed more than 800 people during his stay. Most of these people had neurological-type problems such as Fibromyalgia, Chronic Fatigue Syndrome, insomnia, depression, anxiety, bipolar disorder, Multiple Sclerosis, Cerebral Palsy, Parkinson's, chronic pain and menstrual difficulties. I can verify that more than 85% of the people he blessed received complete recovery from their suffering and 50% of those people improved within one week. These people had lost hope for their future and the results are absolutely miraculous not only for the patient but also for their families and friends. There are three areas of consideration in this project. First, we will measure pre-and post blessing results with reliable, accepted medical tests. This will demonstrate the long term, concrete results from his miraculous blessings. Attached you will find a report from Dr. Chu, a Canadian doctor, who writes about the complete recovery of one of his patients who suffered from Multiple Sclerosis, including the miraculous changes in the patient's medical blood tests, physical exam and his ability to work, care for his children, sleep and live without constant pain. You will also find a testimonial written by this patient, Jim, and his wife, Kim. Second, we are examining Guruji's structural and functional body and finding that his body is completely unique from any other human in the all respects. We need to continue this area of research, particularly in the areas of neurology and genetic science. Thirdly, we will measure the impact of his Divine energy on the people he blesses.

This is a large undertaking and requires expertise in many areas. To date various experts have performed five tests on Guruji. Each expert has concluded that their findings are "highly unique" and have never been seen before. I have attached these reports for your review.

a) **Computerized Biofeedback** by Professor R.H. Brian Costello, Chairman of the International Council of Integrative Medicine, Melbourne (Australia). Dr. Costello has been developing, researching and performing Computerized Biofeedback tests since 1979 and is a Professor at Swinburne University Graduate School of Integrative Medicine. Dr. Costello found that Guruji's **central nervous system was simultaneously in the highest state of excitement and the highest state of calm**. Dr. Costello stated that in over 25 years of practice and measuring over 100,000 people in the USA and Australia he has never seen results like these, they are completely unique.

b) Attached you will find a report on the Effect of Cosmic Rays and Divine Energy Emitted Through the Body of Guruji onto Others, which describes the current scientific research on energy medicine and the relationship between Guruji's electromagnetic field, low brain wave frequency in the delta wave length (0-4 Hertz), and his slow crania sacral rhythm of 172-180 seconds/cycle. A normal healthy person has a cranial sacral rhythm of 6-10 seconds/cycle and that person in a coma, or right before death, has a rhythm of 15-20 seconds/cycle. However, Guruji's **cranial sacral rhythm to be 172-180 seconds for one cycle**. This has never been found in any human and that his rhythm is **9 times slower than the slowest rhythm ever recorded. This is the equivalent of having heart pulse rate of 10 beats per minute.**

c) **Arterial Pulse Wave Analysis** by Dr. John Levin, Anti-Aging Medicine Physician, Melbourne (Australia). Dr. Levin has been in private practice for over 40 years and is one of the few doctors in Australia with a specialty in Anti-Aging Medicine. Dr. Levin's testing revealed that Guruji has **0% atherosclerotic plaquing** in his arteries and that his blood vessels have the **maximum elasticity** that the technology can measure. Dr. Levin stated that in over 40 years of practice he has never seen results like this, and he stated that under normal healthy conditions the arteries begin to stiffen after 10 years of age.

d) **Full body thermal imaging** by Pip McCahon of Medical Infrared Digital Imaging, Canberra (Australia). Pip McCahon is the only certified Thermology analyst in Australia and is the owner of three Medical Infrared Digital Imaging Clinics. Pip McCahon explained that normal, healthy results are symmetrical with an even temperature distribution throughout the body. She took a complete history and examined Guruji with her technology and found **extreme temperature contrasts of 4.5 degrees centigrade within a few inches in each hand and each foot (the distance from the finger tips to the palm) (the distance from the ends of the toes to the ankle). There was a 7 degree centigrade difference between his upper torso and his abdomen, and a 5 degrees**

between the front and back of his torso. She stated that there was asymmetry from right to left side and there were patterns of extreme temperature contrast in 40-50 locations throughout the body that were completely unique.

She declared that she has never seen results like this in Australia or the USA unless the person is extremely physically debilitated. She also stated that there was no correlation between his findings and his excellent health.

e) **Full Spine x-rays** were read by orthopedic surgeon, Dr. Choudhary, Mumbai (India). Dr. Choudhary is considered the top orthopedic surgeon in India and is on staff at the most prestigious hospital in Mumbai (Bombay). Dr. Choudhary stated that Guruji's **x-ray study represented the normal healthy findings of a male between 18-25 years of age and that these finding are completely unique as he has never seen x-rays of a 41 years old man without some degree of degeneration.**

Guruji's Divine energy is also related to Crop Circles throughout the world. The Divine energy of a crop circle is an opportunity for scientists to measure Guruji's Divine energy and ability to make changes locally, or from a distance, not only in humans but on trees, plants and the earth itself. A documentary film is currently being made in India on a cashew farm where Guruji visited and shifted the electromagnetic field in that area. At 1.5 years, the cashew plants have had extraordinary growth and display the thickness, growth and vitality beyond what is normal for healthy plant of 7-8 years. This is extraordinary considering these plants have had minimal fertilizer and chemicals. The changes in the plants on the cashew farm are miraculous and have been carefully documented and filmed. The soil is also very different in the area of these cashew plants compared to the rest of the farm. Guruji has also shown miracles on young plants and on barren, unfertile ground on another farm in India. He is prepared and ready to show his miracle in any place and at any time for the purpose of scientists from all fields of study and measure the effects of his Divine energy and to measure the energy itself. In summary, we are searching for scientists specifically in the areas of neurological disease, genetics, chronic pain, anti-aging medicine, physics, biophysics, bioengineering and crop circle research. If you know of any scientists, doctors or practitioners in Australia, USA, Germany or UK it would be of great value to our project. I tank you in advance for your assistance and look forward to your reply at the earliest. You can reach me at …
